

TEST B

Senior Support Engineer | Technical Publications Expert

☎ +88 20 7111 4567 @ 7222@qq.com 🌐 www.fake.com 📍 Leicester

SUMMARY

With over a decade of experience in technical publications within the engineering sector, I possess a strong foundation in document management, ASD S1000D specifications, and XML authoring tools. My career highlight includes enhancing document accuracy by 25% through the strategic implementation of new software, underpinning my ability to drive critical documentation improvements.

EXPERIENCE

Lead Technical Writer

Rolls-Royce

📅 05/2019 - Present 📍 Derby

- Developed and maintained technical documentation for aero-engine control systems for commercial aircraft with an emphasis on accuracy, leading to a 20% decrease in customer support queries.
- Managed a team of 4 technical writers, delivering project documentation 15% ahead of schedule, which increased departmental efficiency.
- Designed an internal training program for junior writers that improved team skills and reduced onboarding time by 30%.
- Conducted detailed analysis of engineering specifications to produce over 100 technical manuals that enhanced product comprehensibility for global clients.
- Implemented new XML-based authoring tools, resulting in a 25% reduction in documentation errors while adhering to ASD S1000D 4.1 specifications.
- Collaborated with graphic designers, producing over 50 graphic mark-ups that supported complex engineering concepts visually.

Senior Technical Document Specialist

BAE Systems

📅 02/2016 - 04/2019 📍 Filton

- Spearheaded the transformation of engineering documents into user-friendly manuals for military land vehicles, increasing customer comprehension by 40%.
- Conducted 15+ Impact Assessments annually to determine documentation requirements and updates in line with engineering advancements.
- Facilitated cross-functional workshops on document management and control, elevating the overall knowledge within the engineering department.
- Authored 200+ Data Modules for Common Source Database, improving data consistency across all platforms.
- Optimized document management systems, leading to a 10% increase in workflow efficiency through improved configuration control.

Technical Publications Specialist

GE Aviation

📅 08/2012 - 01/2016 📍 Cheltenham

- Managed digitalization of 50+ legacy technical manuals for aviation systems into XML format, which streamlined data retrieval.
- Designed and quality checked 75+ technical illustrations that provided clear visual instructions, enhancing user engagement.
- Coordinated with engineers to resolve 100+ technical/formatting issues maintaining project deadlines.
- Introduced quality control protocols that improved data module accuracy by 20%.

EDUCATION

Master of Engineering (MEng) in Aerospace Engineering

Imperial College London

📅 01/2008 - 01/2012 📍 London

Bachelor of Engineering (BEng) in Mechanical Engineering

University of Leicester

📅 01/2005 - 01/2008 📍 Leicester

PROJECTS

XMLEagle Editor

Contributed to an open source XML editor designed to simplify the creation of technical documentation according to industry standards. See project at github.com/XMLEagleEditor

TechDoc Automation Toolkit

Developed a suite of tools to streamline the technical documentation process, including automated quality checks and data conversion scripts. Project details at github.com/TechDocToolkit

KEY ACHIEVEMENTS

Implemented New Authoring Tools

Selected and implemented new XML-based authoring tools that reduced documentation errors by 25% across multiple engineering projects.

Managed Cross-Functional Teams

Led and managed a diverse team of 4 technical writers, designers, and engineers to deliver comprehensive technical publications.
